NASA: We could find alien life in 20 years

Watch the video on NASA's standpoint on alien life and answer the questions.

1 Decide whether the following statements are true or false. Correct if false.

/6

Statement	True	False
Charles Bolden is a space expert but he has never been up in space himself. He has been to space.	X	X
The focus of the agency to find out about alien life is the period 2020-2030.	X	
Charles Bolden claims there is a chance that alien life is more advanced than life on earth.	X	
The oldest NASA rover is named Curiosity. Opportunity		X
NASA thinks the rovers are more of use than humans on the planets. humans rovers		X
Astronauts think that there is alien life.	X	

2 Watch the video again and answer these questions.

/4

a Define what alien life is.

Anything that is organic, not only animals, but also plants, a building block of life, microbes, or more advanced type of life.

b How will NASA find out?

With rovers, robots that take soil and rocks for research. And later by sending humans.

True	False	Charles Bolden is a space expert but he has never been up in space himself.
X	X	He has been to space.
	X	The focus of the agency to find out about alien life is the period 2020-2030.
	X	Charles Bolden claims there is a chance that alien life is more advanced than life on earth.
X		The oldest NASA rover is named Opportunity.
X		NASA thinks the rovers are more of use than humans on the planets.
	X	Astronomers think that there is alien life.
